Success Story

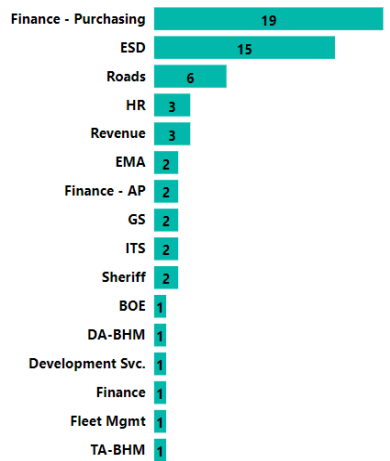

“The *Outstanding POs BI report* is a great tool that helps identify dated purchase orders in Munis, prompting the user to research the cause for delayed order closure. There are times when resolving outstanding POs requires a collaborative effort, therefore this report is accessible to departments and accounts payable. Outstanding orders have the potential to inflate the budget. Sorting BI report records by dates and amounts informs which POs to tackle when preparing for year-end close. The BI report user-friendly filters and charts provide summary and real-time data insights at a glance.” - Valerie Alves-Henderson, Purchasing Coordinator, Finance
