IMPACT AND UNMET NEEDS ASSESSMENT Jefferson County Action Plan for Disaster Recovery (April 27, 2011 Tornado) Preface The April 27, 2011 tornado devastated Jefferson County, causing over \$600 million in property damage. According to the Jefferson County Coroner office 21 persons were killed in the storm. According to the Jefferson County Emergency Management Agency, there were multiple tornados ranging in capacity from EF-4 to EF-5 that impacted Jefferson County. The recovery effort began immediately with various local, state, and federal agencies responding. The responding agencies included the local Jefferson County Emergency Management Agency; local law enforcement agencies, the Alabama National Guard; FEMA, as well other community based and volunteer organizations. This section of the Action Plan will address eligible areas in the Jefferson County HUD Consortium impacted by the April 27, 2011 tornado; define unmet needs; provide a historical perspective of tornados impacting Jefferson County; present contributing factors to frequent tornado activity in the county; provide an initial needs assessment by local and federal agencies; provide an overview of recent public meetings held in the impacted communities to determine unmet needs; present the Jefferson County CDBG-DR program guidelines; and present a proposed disbursement of the county CDBG-DR funds. Eligible Areas Impacted by the April 2011 Tornado The areas eligible for the Jefferson County Community Development Block Grant Disaster Recovery (CDBG-DR) funds include Concord, Pleasant Grove, Alabama, North Smithfield, McDonald Chapel, Warrior, Alabama, Fultondale, Alabama and Vestavia Hills, Alabama. Unmet Needs Defined An unmet need is defined as the difference between damages sustained in the impacted areas during the storm event mentioned above and post disaster resources the impacted areas are eligible to receive in the recovery effort. Participants receiving assistance from insurance payments, FEMA, SBA, etcetera will be documented and not duplicated. Historical Perspective of Tornados in Jefferson County Since the 1950s, Jefferson County has experienced five (5) major tornados. The capacity of these tornados has ranged from EF-4 to EF-5. The county was struck by major tornados in 1956, 1977, 1998, 2011 and 2012. Below is an overview of the first three (3) major storm events that hit Jefferson County, which will be followed by the two (2) most recent tornado events. The first tornado, which occurred on April 15, 1956, originated near Pleasant Grove, Alabama with an approximate 21 mile path and struck the communities of Edgewater, Tarrant, Alabama, McDonald Chapel and Pratt City, which is a community in Birmingham, Alabama. The second major tornado struck on April 4, 1977. This F-5 tornado moved through Pratt and Nthfield and killed/p> The third major tornado struck the Oak Grove community on April 8, 1998 and killed 32 people. Approximately a year after the April 2011 massive tornado event, the staff from the Community and Economic Development Department conducted a series of meetings in the impacted areas mentioned above in order to explain to the citizens which

activities are eligible under the CDBG-DR HUD Disaster program. These meetings were conducted between May 10, 2012 and June 5, 2012.

In each of the public meetings, local officials and the public were informed of the meaning of unmet need, as well as given an overview of eligibility activities to include the following:

Housing Rehabilitation

1. Rebuilding Homes
2. Down Payment Assistance and/or Closing Costs
3. Public Facilities
4. Demolition
5. Debris Removal
