

FY2016 Paving Plan

Jefferson County Roads and Transportation

Presented by
Tracy Pate

Interim Director/County Engineer
Jefferson County Roads and Transportation Department

At the Committee Meeting of the Jefferson County Commission
October 20, 2015

FY2015 “Leftovers”

82 miles was fully completed as promised, but two projects were still underway, and a couple of roads were added “in-house”:

- Camp Bessemer
 - 2.7 miles
- Jefferson County Project JCP 15-02
 - 24.7 miles
- ALDOT Project STPBH-3715(252)
 - 8.1 miles of resurfacing
 - 7.3 miles of patching and encroachment removal (*not included in mileage total*)

Total = 117.2 miles FY2015

FY 2016 Plan Overview

- 63.3 total miles of roadway*
 - 30.6 miles of “in-house”
 - 32.7 miles of contract work
- 22 culvert/bridge locations
 - Most of these are corrugated metal needing replacement
 - Smallest Size = 18” Single
 - Largest Sizes = 60” equivalent double
 - About a quarter mile of drain laid end to end

Why Less Miles than 2015?

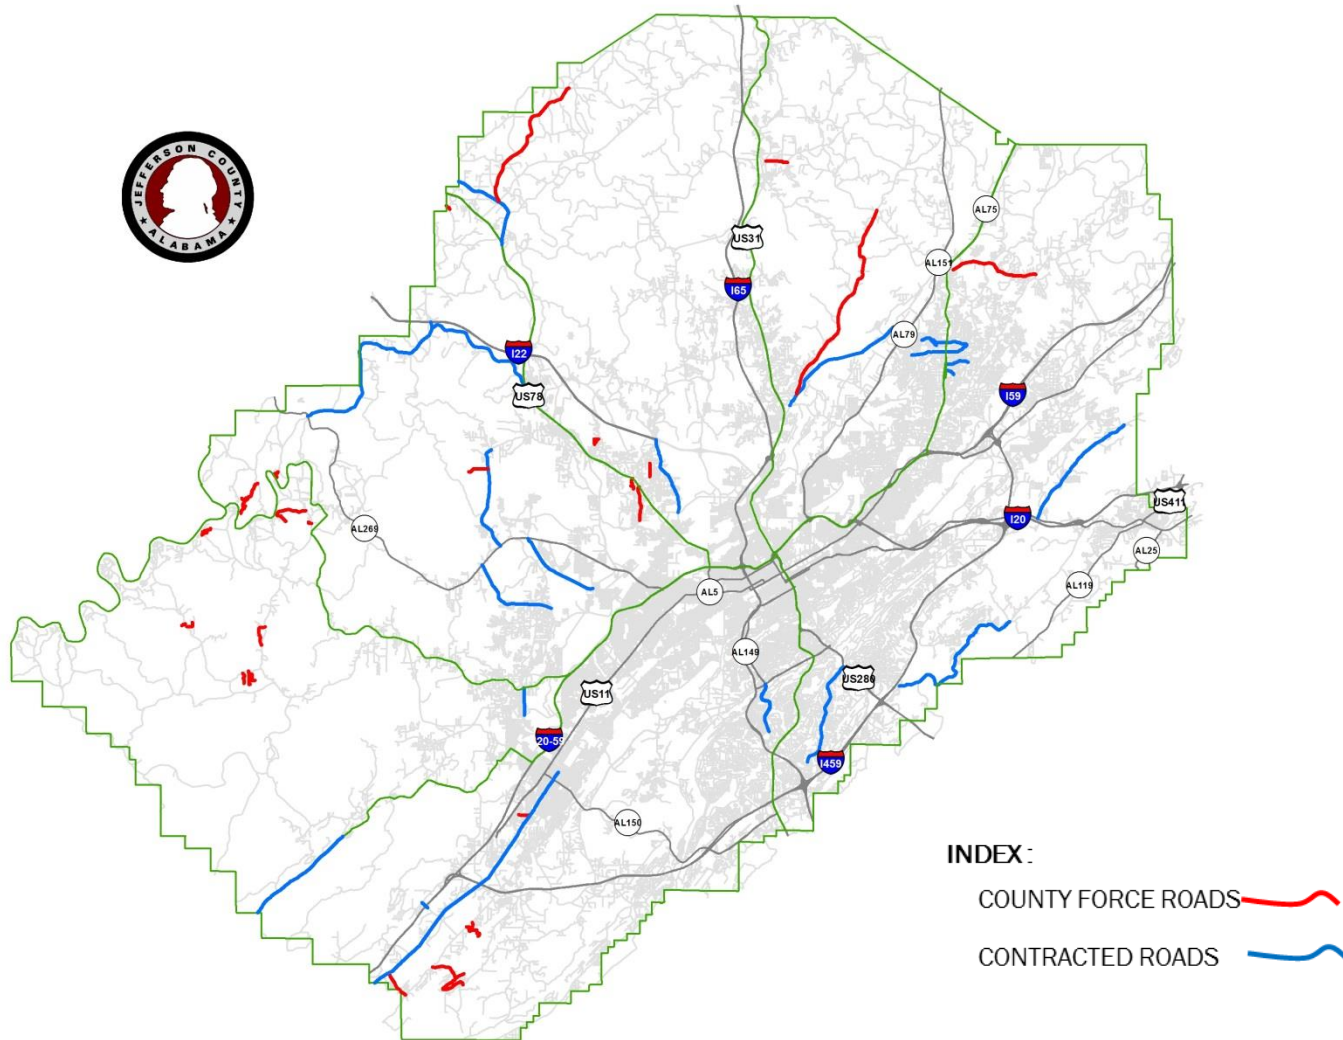

- Some roadways will require more than just resurfacing = higher cost
- Need to catch up on other maintenance beyond paving = culverts, bridges, territory work
- Balancing available resources = delivery of commitment

*Can we get to 100 miles?

- Funding was added to the FY2016 budget to accomplish this goal
- Positions are being filled, but still hard to predict staffing levels in the next few months
- We should be able to name additional roads by spring for a summer letting
- This additional project would get us to 100 miles of paving
